Special knowledge, skills and abilities

The successful candidate will be an innovative, future-thinking team player, eager to learn and share knowledge with teammates and users. He or she will be a strong communicator with a passion for using current and emerging technology to enhance the KSHS customer experience.

Preferred qualifications for the position include:

**Knowledge of**

- Application development best practices, tools, and techniques;
- A web programming language, such as PHP or Python;
- A web development framework using the Model-view-controller architecture, such as CakePHP or Django;
- Web markup, including HTML5 and CSS;
- Web content management systems such as Drupal, Joomla, or concrete5;
- Relational database systems and SQL in support of web applications;
- Responsive web design;
- Search enhancement technologies, including search platforms such as Solr;
- Web application load and performance testing tools;
- Web analytics, including tools such as Google Analytics;
- Mobile application development on multiple platforms, including both iOS and Android;
- Web and mobile application accessibility requirements and technologies;
- Linux operating system; software versioning and revision control systems (e.g. Subversion), and the Apache web server.

**Ability to**

- Aggressively stay informed on emerging trends in technology and share knowledge with teammates and stakeholders;
- Work collaboratively with co-workers in a team environment;
- Listen actively and ask clarifying questions;
- Communicate ideas clearly, concisely, and intelligibly -- both verbally and in writing -- to functional users, other developers, graphic designers, marketing professionals, managers, and external vendors;
- Accurately estimate time and resources required to implement proposed projects, share estimates with stakeholders and management, and complete project in accordance with estimates;
- Effectively management multiple projects and priorities with minimal supervision;
- Convert functional requirements and logical models into a technical application design;
- Convert mockups and layouts from a graphic designer into production-ready code;
- Design, plan and execute application testing strategies and tactics to ensure software quality throughout all stages of application development;
- Implement commercial and open source application software and integrate with existing applications, databases, and technology platforms;
- Consistently and thoroughly document custom applications and any modifications made to commercial and open source applications.

---

Experience - Length in years and kind

One year experience coding, testing, and debugging application programs or two years' experience coding, testing, debugging, and documenting application programs. Education may be substituted for experience as determined relevant by the agency.

---

**28. SPECIAL QUALIFICATIONS**

State any additional qualifications for this position that are necessary either as a physical requirement of an incumbent on the job, a necessary special requirement, a bona fide occupational qualification (BFOQ) or other requirement that does not contradict the education and experience statement on the class specification. A special requirement must be listed here in order to obtain selective certification.
