Describe the present and original (if known) physical appearance

The eighteen nominated byre and bluff barns of Doniphan County (ca. 1860–1933) are located south of US Highway 36 in Doniphan County, Kansas (pop. 9,268), with the exception of three barns, which are located north of the highway. The land south of the present highway has a gently rolling terrain, historically attracting stock and dairy cattle farmers. The land north of the highway borders the Missouri River and is rimmed by massive bluffs of unstable, loess soil.

Most of the nominated barns were built to house stock and dairy cows and remain in active agricultural use. These vernacular wooden and cement structures share a common feature in that at least one side of each barn's foundation is embedded in an earthen bank or bluff; the majority of the barns are built into shallow banks, two of the barns are built into bluffs.

Twelve of the eighteen barns are one-story, three-bay, center entrance, wooden structures with limestone foundations and gable roofs. Eleven of these twelve structures have full byre or basement levels. All of the barns are characterized as one-story, having either a threshing or a hay floor on the ground level and a byre or basement level, eleven of the barns have extant hay lofts. Fourteen of the barns are built into a northern embankment.

There are groupings of period types, such as the six board and batten gable roof barns constructed in the 1870s and 1880s whose louvered venting forms an integral part of their styling; the three, large, gambrel roof, cement barns of the 1910s and 1930s, two of which were built into bluffs; and the gradual transition from mortised and tenoned, post and beam construction to nailed plank and balloon framing.

The byre and bluff barns of Doniphan County are relatively rare. The nominated barns maintain a high degree of structural and architectural integrity, the common alteration affecting many of the buildings has been the replacement of the original roof with a metal roof.

The byre and bluff barns built between 1860 and 1933 generally cost from $2,000.00 to $3,000.00 and while this may have been cost effective investment, it was an expensive investment. In addition, the higher degree of skilled craftsmanship required to construct a byre or bluff barn as opposed to most barns without foundations also hindered their construction. While the byre and bluff barns of Doniphan County are a sturdy survivor of a barn type built in Doniphan County between 1860 and 1933 they are not prolific, being far outnumbered by more inexpensive, rectangular wooden barns without foundations.
