National Register of Historic Places  
Registration Form  

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in How to Complete the National Register of Historic Places Registration Form (National Register Bulletin 16A). Complete each item by marking "X" in the appropriate box or by entering the information requested. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word processor, or computer, to complete all items.

1. Name of Property

Historic name: Stein Residence  
Other name/site number:  

2. Location

420 Cedar Street  
Ashland  
state Kansas code KS county Clark  
not for publication  

viciinity code 025 zip code 67811  

3. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act of 1986, as amended, I hereby certify that this ___nomination ___request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60. In my opinion, the property ___meets ___does not meet the National Register criteria. I recommend that this property be considered significant ___nationally ___statewide ___locally.  
(See continuation sheet for additional comments.)

Signature of certifying official ___________________________ Date 12/6/00

State or Federal agency and bureau

In my opinion, the property ___meets ___does not meet the National Register criteria.  
(See continuation sheet for additional comments.)

Signature of commenting or other official ___________________________ Date

State or Federal agency and bureau

4. National Park Service Certification

I, hereby, certify that this property is:  
___entered in the National Register.  
See continuation sheet

___determined eligible for the National Register.  
See continuation sheet

___determined not eligible for the National Register.  

___removed from the National Register.  

___other, (explain:)

_Narrative Description_ (Describe the historic and current condition of the property on one or more continuation sheets.)
B. Statement of Significance

Applicable National Register Criteria (Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing.)

___ A Property is associated with events that have made a significant contribution to the broad patterns of our history.

___ B Property is associated with the lives of persons significant in our past.

X C Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.

___ D Property has yielded, or is likely to yield, information important in prehistory or history.

Criteria Considerations (Mark "x" in all the boxes that apply.)

___ A owned by a religious institution or used for religious purposes.

___ B removed from its original location.

___ C a birthplace or a grave.

___ D a cemetery.

___ E a reconstructed building, object, or structure.

___ F a commemorative property.

___ G less than 50 years of age or achieved significance within the past 50 years.

state Missouri

Additional Documentation

Submit the following items with the completed form:

Continuation Sheets

Maps
A USGS map (7.5 or 15 minute series) indicating the property's location.
A sketch map for historic districts and properties having large acreage or numerous resources.

Photographs
Representative black and white photographs of the property.

Additional items (Check with the SHPO or FPO for any additional items.)

Property Owner (Complete this item at the request of the SHPO or FPO.)

name Sydna Hess
street & number 420 Cedar Street
city or town Ashland
state KS

telephone (316) 315-2149
DESCRIPTION

The Stein Residence is a one-story, three bedroom, front-gabled Lustron dwelling with a modified Westchester Deluxe Plan. The 31-foot by 47-foot house has “Surf Blue” walls with white trim and a dark brown roof.

Resting on a concrete slab foundation, the dwelling has a west-facing, rectangular plan. Porcelain enameled steel panels clad all exterior surfaces. Two-foot by two-foot panels sheath the dwelling’s four walls. Narrower, vertical panels, approximately one-foot wide, cover the gable ends. Square “shingles”, approximately one-foot square, cover the roof. The eaves of the front-gabled roof overhang slightly on all sides of the dwelling.

Steel gutters run along the long (north and south) sides of the dwelling. One end of each gutter terminates in a downspout that is angled slightly toward the house. A wavy steel dowel fills the space between the downspout and the dwelling wall to create a trellis.

Openings asymmetrically pierce the walls of the dwelling. The steel windows have enameled steel surrounds and appear in three configurations: 1) a tripartite bay window, featuring a large plate of fixed glass flanked by four-light aluminum casements, projects slightly from the wall of the building in a paneled steel surround just east of the dwelling’s southwest corner; 2) tripartite windows of the same configuration but flush with the body of the dwelling pierce the dwelling’s south, west and north elevations; and 3) pairs of three-light casements pierce the east south and north elevations. An aluminum awning covers the tripartite window immediately north of the front (east) door.

Enamedeled steel-shingled awnings supported on pairs of simple triangular steel brackets top the doorways located in the east and west elevations. Both doors have aluminum storms of a modern vintage.

The interior of the dwelling retains most of its original Lustron materials and built-in features. Like the exterior, porcelain-enameled steel panels clad the interior walls and ceilings. The wall panels typically measure two-feet by eight feet, with some larger panels framing the windows, while the ceiling panels are eight feet square. Modern carpet and sheet vinyl cover the original asphalt tile flooring.

The living room-dining area occupies the southeast portion of the dwelling, with the kitchen and utility room filling out the southwest corner. The bathroom and three bedrooms are located off a central corridor. While the original metal cabinetry has been replaced in the kitchen, the dwelling retains the built-in china cabinet in the dining area with the pass-through between the kitchen and dining area. This latter feature distinguishes the dwelling as a Deluxe edition of the Westchester house model. Other built-in features characteristic of the Westchester Deluxe include bookshelves in the living room, the mirrored vanity in the master bedroom, and closets and overhead storage throughout the dwelling.

Garage

Adjacent to the dwelling is a three-car, south-facing side-gabled Lustron garage. Like the dwelling, the garage rests on a concrete slab foundation and is clad with the same variety of porcelain-enameled steel panels. However, the garage has wood rather than steel framing. Two panels on the rear of the garage appear to have been replaced with two-foot by two-foot metal panels that have a slight pyramidal shape. Fenestration includes a pair of casement windows in the east elevation and a single six-light glass block window in the north elevation.
Narrow, horizontal steel panels compose the original overhead doors in the structure's western two bays. The workshop that originally occupied the east end of the garage was converted to a bedroom with a bath by the original owners and is currently a beauty shop.

Site
This property occupies a lot at the northeast corner of Fifth Street and South Cedar. A concrete drive leads to the garage, and an adjacent concrete patio connects the driveway to the dwelling. A slightly curved concrete walk leads from South Cedar Street to the front door. A section of wood privacy fence connects the southwest corner of the garage and approximately the midpoint on the north wall of the dwelling. A second, short section of identical fencing heads south off the southeast corner of the dwelling.

The grassy lot is dotted with deciduous and evergreen trees as well as a few ornamental shrubs near the southeast corner of the dwelling.

INTEGRITY
Although the Stein Residence exhibits minor rusting and has a few dented exterior panels, it is in overall good condition as is the associated Lustron garage. The dwelling retains many of its original features, including the identification tag, windows, and built-ins. Alterations have been very minor, affecting only interior cosmetic features, such as the installation of carpeting over the original tile floor, replacement of the kitchen cabinetry, and installation of ceiling fans. These limited modifications do not diminish the overall integrity of the property and the original workmanship, materials, design setting, feeling and association of the property remain readily apparent.
STATEMENT OF SIGNIFICANCE

The Stein Residence is significant under National Register Criterion C for the area of ARCHITECTURE. It is an excellent example of the Lustron House property type, and it is one of only one hundred Lustron houses extant in Kansas. Although quite a few Lustrons remain extant in southwest and southcentral Kansas, this is the only Lustron in Clark County. This property is also distinguished by its plan, which expanded the standard size of a Westchester Deluxe Lustron. Lustron’s concept of prefabrication minimized customization of house plans in order to maintain level costs and speed delivery and construction. This is the only documented example in Kansas of a Lustron house that was constructed with a plan that varied significantly from the standard corporate design.

In an effort to solve the post-World War II housing crisis, the Lustron Corporation, lead by Carl Stradlund, applied porcelain-enamed steel technology to residential design, producing a pre-fabricated dwelling that was “…fireproof, ratproof, decay-proof, [and] termite proof. Will never deteriorate or stain, never fade, crack or peel, never need painting, refinishing or reroofing [sic]” (Lustron Corp). Available in two-and three-bedroom models, these dwellings resembled typical, wood-frame post-war dwellings. However, their steel frames clad the interior and exterior with porcelain enamel-coated steel panels distinguished Lustrons from more traditional contemporary residential construction.

The Reconstruction Finance Corporation rewarded Stradlund’s efforts with $32.5 million in federal aid, plus the lease of a vacated airplane factory in Columbus, Ohio, for production of the dwelling components. Stradlund applied the tenets of automobile assembly-line mass-production to the Lustron. At the factory all of the components for each dwelling were loaded on a specially designed truck trailer and delivered to the building site, where company-trained builders erected the dwelling following the Lustron instruction manual. The company actively produced Lustron houses between summer 1948 and June 1950. In Kansas Lustrons sold for around $10,000. Sales of Lustron homes never exceeded 250 units per month, far short of the 17,000 units per year that the company promised. The RFC filed foreclosure in March of 1950, and the company ceased production in June of that year having shipped fewer than 2500 of these unique all-steel dwellings nationwide.

SITE HISTORY

Dr. Cletus G. and Margaret J. Stein were the original owners of the Lustron house at 420 Cedar Street. Dr. Stein, known to his friends as Doc, moved to Ashland in 1937 after receiving the degree of Doctor of Dental Surgery at the Kansas City Western Dental College. That same year he married Margaret Jane “Janie” Jones. Dr. and Mrs. Stein raised four sons and two daughters, and both were very active in Ashland civic organizations. (Ashland Centennial Committee 1984; Stein 2000a).

On March 22, 1946 the Steins purchased four vacant lots with the intention of building a new home that offered the modern conveniences their older home could not provide. After learning about Lustron homes from an uncle who had visited an open house in Kinsley, the Steins visited a Lustron in Garden City. Impressed with the permanence and efficiency of the house, Dr. and Mrs. Stein contracted with the Kinsley Lustron dealer, Merlyn Weidenheimer, for the construction of a three-bedroom Westchester Deluxe dwelling and a three-car garage. The dwelling’s serial number (#2465), as well as its construction in mid-1950, indicates that it was among the last
Lustrons built nationwide before the company ceased production. (Clark County Deeds 37:205; Stein 2000a; Stein 2000b).

At the request of the Steins, their three-bedroom Westchester Deluxe was built eight feet longer than the standard 31 x 39 ft. Westchester Deluxe Model and had a door from one bedroom to the back yard. This was highly unusual for a company that emphasized standardization as a means of increasing efficiency and maintaining lower costs. By paying an additional fee, however, the Steins persuaded Weidenheimer to build the additional square footage they needed to accommodate their large family. That construction of this dwelling commenced less than one month prior to the company’s closing may also have been a factor in the Steins’ ability to customize the design.

Concurrent with construction of the house, the Steins built a three-car Lustron garage perpendicular to kitchen-side of the house. Following the birth of two more children, the Steins finished the south end of the garage with a bedroom and bathroom for their two eldest sons. This additional living space gave the Stein’s a total of 1,687 square foot, creating an exceptionally large Lustron.

The Stein family fit the profile of the typical buyer to whom Strandlund marketed the Lustron house. Solidly middle-class with a growing baby boom family, the Steins were attracted to the modern conveniences and low maintenance offered by the Lustron. Mrs. Stein recalled that the Lustron was “a most practical and comfortable home to live in. [The] thick insulation …[provided] a shield against cold, heat and outside noise…. There was no condensation and the heating was a dream. …We all loved and enjoyed living in it” (Stein 2000b, p. 2). She concluded, “I feel it really WAS the home of the future & too bad politics destroyed it. I’ve never lived in a home I enjoyed as much and think the idea should definitely be re-considered at this time” (Ibid.).
