Describe the present and original (if known) physical appearance

The Thompson-Wohlschlegel Round Barn is a circular structure approximately 80 feet in diameter. Its three-tier domed roof rises to a height of 75 feet. The first story consists of a central space 29 feet in diameter, surrounded by a circular access lane about 9 feet wide, and an outer circle of stalls and storage bins about 16 feet wide. The outer walls of the first level are made of rough-faced concrete blocks. A timber frame inside carries the second story hay loft, which covers the stalls and the access lane, but is open over the central space. The external walls as the second story level are clad with vertical boarding siding. Above the hay loft floor the interior of the barn was originally an uninterrupted open space, but in recent years bracing posts have been added. The domical shape of the roof is interrupted by two clerestory sections, the lower having wood shingle siding and the upper fitted with vertical-slat louvers. On the east side of the barn is a two-story gable-roofed projecting block, faced with vertical board-and-batten siding with wood shingles in the gable. This block is flanked by two round, conical-roofed silos, about 13 feet in diameter, made of concrete block.

The farmstead contains several other buildings, but this nomination applies to the barn only.

**Statement of Significance (in one paragraph)**

The Thompson-Wohlschlegel barn is one of the largest and most elaborate examples remaining in Kansas of the round barn of the early twentieth century. The round barns of Kansas were mostly built in the first two decades of the twentieth century, and were considered at the time to be highly innovative and progressive buildings. Only a few examples of the distinctive barn type now remain in the state.

The plans for the building were drawn by Z.C. Thompson, the original owner, and his son C.R. Thompson. They began forming the concrete block in 1910. Actual construction began in 1912 and was completed the following year. The carpentry work was executed in six months by a team of 15 carpenters under the direction of Bill Russell of Anthony, Kansas. The overall cost of construction was $16,000.

The property was purchased by the Wohlschlegel family in 1942. Dale Wohlschlegel has owned it since 1981.

**THIS STATEMENT REFLECTS CURRENT KNOWLEDGE AND IS SUBJECT TO AMENDMENT.**
9. Major Bibliographical References

Interviews by Dale Wohlschlegel with Alma M. Mathes (daughter of the original owner), Arch Thompson (son of the original owner), and Joe Wohlschlegel (who witnessed construction). Long, Paul F. "The Round Barn of Harper County" Kanshistique August, 1975.

This nomination was prepared from materials submitted by the owner, Dale Wohlschlegel.

Description: The Thompson-Wohlschlegel Round Barn is a circular structure approximately
80 feet in diameter. Its three-level domed roof rises to a height of 75 feet. The first
story consists of a central space 29 feet in diameter, surrounded by a circular access
lane about 9 feet wide, and an outer circle of stalls and storage bins about 16 feet wide.
The outer walls of the first level are made of rough-faced concrete blocks. A timber frame
inside carries the second story hay loft, which covers the stalls and the access lane, but
is open over the central space. The external walls at the second story level are clad with
vertical boarding siding. Above the hay loft floor the barn was originally an uninter-
rupted open space, but in recent years bracing posts have been added. The domical shape of
the roof is interrupted by two clerestory sections, the lower having wood shingle siding
and the upper fitted with vertical-slat louvers. On the east side of the barn is a two-
story gable-roofed projecting block, faced with vertical board-and-batten siding with wood
shingles in the gable. This block is flanked by two round, conical-roofed silos made of
concrete block.
Significance  Built in 1912-13, the Thompson-Wohlschlegel barn is one of the largest and most elaborate examples remaining in Kansas of the round barns of the early twentieth century. The round barns of Kansas were mostly built in the first two decades of the twentieth century, and were considered at the time of be highly innovative and progressive buildings. Only a few examples of this distinctive barn type now remain.
