National Register of Historic Places
Registration Form

This form is for use in nominating or requesting determinations of eligibility for individual properties or districts. See instructions in Guidelines for Completing National Register Forms (National Register Bulletin 16). Complete each item by marking "x" in the appropriate box or by entering the requested information. If an item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, style, materials, and areas of significance, enter only the categories and subcategories listed in the instructions. For additional space use continuation sheets (Form 10-900b). Type all entries.

1. Name of Property
   historic name West Sappa Creek Lattice
   other names/site number West Sappa Creek Lattice

2. Location
   On unimproved county road 4 miles north & .2 miles west of intersection F.A.S. 1970 & F.A.S. 839
   street & number on unmarked county road
   city, town Norton
   state Kansas code KS county Norton code 57
   not for publication
   vicinities
   zip code: 67654

3. Classification
   Ownership of Property
     □ private
     □ public-local
     □ public-State
     □ public-Federal
   Category of Property
     □ building(s)
     □ district
     □ site
     □ structure
     □ object
   Number of Resources within Property
     Contributing
       □ buildings
       □ sites
       □ structures
     □ objects
     □ Total
   Number of contributing resources previously listed in the National Register 0
   Name of related multiple property listing:
   Metal Truss Bridges in Kansas

4. State/Federal Agency Certification
   As the designated authority under the National Historic Preservation Act of 1966, as amended, I hereby certify that this nomination □ request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60. In my opinion, the property □ meets □ does not meet the National Register criteria. □ See continuation sheet.
   Signature of certifying official
   Date
   State or Federal agency and bureau
   In my opinion, the property □ meets □ does not meet the National Register criteria. □ See continuation sheet.
   Signature of commenting or other official
   Date
   State or Federal agency and bureau

5. National Park Service Certification
   I, hereby, certify that this property is:
   □ entered in the National Register.
     □ See continuation sheet.
   □ determined eligible for the National Register. □ See continuation sheet.
   □ determined not eligible for the National Register.
   □ removed from the National Register.
     □ other, (explain:)

   Signature of the Keeper
   Date

137-0000-0040
6. Function or Use

Historic Functions (enter categories from instructions)

Transportation: Road Related (Vehicular): Bridge

Current Functions (enter categories from instructions)

Transportation: Road Related Vehicular: Bridge

7. Description

Architectural Classification
(enter categories from instructions)

Other: Lattice Pony Truss

Materials (enter categories from instructions)

foundation

walls

roof

other Metal: Wrought Iron or Steel

Describe present and historic physical appearance.

The West Sappa Creek bridge, erected ca. 1900, is a lattice girder of riveted construction. The single span is 38 1/2 feet long and 15 1/2 feet wide. The concrete deck rises 3 feet above the bottom of the stream channel. The bridge is located at a slight bend of the road and sits on a slight northeast-southwest alignment. This is often true with early bridges as this misalignment allowed a right angle approach to the river and a saving of money in both bridge length and amount of fill required.

The members of a truss bridge are designated either as chord members or web members. Chord members are those mainly defining the outlines of the structure and they are termed lower or upper chord members depending on whether they are found at the bottom or the top of the structure. Members between the chords are web members. They are called posts or ties if they sustain compression or tension respectively. In the instance of the West Sappa Creek bridge, the chords and endposts are fabricated from angle stock riveted to a top cover plate. A bar lattice is used to form the two respective panels, which become a strong and stiff web. No external sway bracing is used in this particular design. Iron eye bars are wrapped around and over the top chord and attached to the bottom chord by the use of a pin. This consists of metal I beams suspended below the bottom chord at these pin connection points. Cast iron sunflowers form a decorative element on both panels. The road is very highly traveled and the bridge retains a high degree of structural integrity.
The Town lattice truss was patented by Ithel Town in 1820. The closely spaced diagonal members created a stiff web that was quite strong. The early examples were constructed of wood, but by the late 19th century a few were constructed of metal, generally wrought iron.

No construction data has presently been located about the West Sappa Creek bridge. It was selected as a candidate in this nomination as it is a good example of late lattice truss design with good integrity. Approximately ten lattice pony trusses are known to exist in Kansas. All are approximately the same length of 36 feet. Eight of these ten bridges remain in Norton county.

The Canton Bridge Company, Canton, Ohio, was advertising in the Engineering Record, as early as 1876, but little is known about their early history. It was incorporated in 1891 by W. E. Sherlock, President, and V. H. Hammond, Vice President, and C. E. Timkler, Chief Engineer. It is possible that V. H. Hammond was a relative of Wrought Iron Bridge Company's D. Hammond. The company operated independently until 1925, when it was purchase by Massillon Steel Joist Company of Massillon, Ohio. In 1927 the two companies were merged into the Macomber Steel Company and the Canton Bridge Company name was dropped.

The Kansas Department of Transportation (KDOT) carried out a statewide inventory of historic bridges between 1980 and 1983. The bridges to be included were identified through computer printouts developed by KDOT, from information supplied by the counties (since almost all of the historic bridges were located on secondary rather than the primary road system), and by direct observation by field personnel. All bridges were inspected by KDOT personnel to verify the data on file. That information was jointly evaluated by representatives of KDOT, Kansas State Historical Society, and the State Historic Preservation Officer.
Each structure was evaluated using a points rating system adapted from the points evaluation rating developed by the Ohio Department of Transportation and Ohio Historic Preservation Office. Consideration was given to areas such as age, builder, number of spans, length, special features, history, integrity, surviving numbers, and preservation potential.

In many instances there is little information about individual structures. Often bridge plaques which may have contained information have been removed, or the county's records are not complete or have been destroyed. Due to the large numbers of similar structures there is often little to choose from in differentiating among individual bridges other than condition and the likelihood of preservation.

The purpose of the KDOT study and subsequent evaluation was to identify a representative selection of bridges of each class. Through this approach KDOT and KSHS hope to preserve for posterity some examples of each type.

Verbal Boundary Description

The nominated property is located on the NW 1/4, NW 1/4, NE 1/4, NE 1/4, section 11, township 1 south, range 25 west on a tract measuring 38 1/2' x 15 1/2' whose northeast corner is represented by the northeast corner of the bridge. Beginning at the northeast corner the boundary proceeds 38 1/2' southwest, 15 1/4' northwest, 100' northeast, and 16' southeast to the point of beginning.

Boundary Justification

The boundary includes only that area that is historically associated with the nominated property.
