National Register of Historic Places Registration Form

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in "How to Complete the National Register of Historic Places Registration Form" (National Register Bulletin 16A). Complete each item by marking "X" in the appropriate box or by entering the information requested. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word processor, or computer, to complete all items.

1. Name of Property

Historic name: Ooten House

Other name/site number: __________________________

2. Location

507 West 15th Street

Larned

state Kansas code KS county Pawnee code 145 zip code 67560

3. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act of 1986, as amended, I hereby certify that this ______nomination ______request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60.

In my opinion, the property ______meets ______does not meet the National Register criteria. I recommend that this property be considered significant ______nationally ______statewide ______locally. (____ See continuation sheet for additional comments.)

Signature of certifying official __________________________ Date 12/16/00

State or Federal agency and bureau

In my opinion, the property ______meets ______does not meet the National Register criteria. (____ See continuation sheet for additional comments.)

Signature of commenting or other official __________________________ Date __________________________

State or Federal agency and bureau

4. National Park Service Certification

I, hereby, certify that this property is:

____ entered in the National Register. (____ See continuation sheet)

____ determined eligible for the National Register. (____ See continuation sheet)

____ determined not eligible for the National Register.

____ removed from the National Register.

____ other, (explain: __________________________

8. Statement of Significance

Applicable National Register Criteria (Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing.)

- A Property is associated with events that have made a significant contribution to the broad patterns of our history.
- B Property is associated with the lives of persons significant in our past.
- C Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- D Property has yielded, or is likely to yield, information important in prehistory or history.

Criteria Considerations (Mark "x" in all the boxes that apply.)

- A owned by a religious institution or used for religious purposes.
- B removed from its original location.
- C a birthplace or a grave.
- D a cemetery.
- E a reconstructed building, object, or structure.
- F a commemorative property.
- G less than 50 years of age or achieved significance within the past 50 years.

Areas of Significance

city or town Larned
state KS zip code 67550
The Ooten House is a two bedroom, front-gabled Lustron dwelling with a Newport Deluxe Plan. The steel-frame structure is clad on the interior and exterior with porcelain enameled steel panels. The 23-foot by 31-foot house has “Desert Tan” walls with white trim and a dove gray roof.

Resting on a concrete slab foundation, the dwelling has a north-facing, rectangular plan. Porcelain enameled steel panels clad all exterior surfaces. Two-foot by two-foot panels sheath the dwelling’s four walls. Narrower, vertical panels, approximately one-foot wide, cover the gable ends. Square “shingles,” approximately one-foot square, cover the roof. The eaves of the front-gabled roof overhang slightly along the side walls but are tight along the end walls. A Lustron-paneled chimney rises from the center of the east roof slope just off the ridge.

One end of each gutter running along the long (east and west) sides of the dwelling terminates in a downspout that is angled slightly toward the house.

Openings asymmetrically pierce the walls of the dwelling. The steel windows have enameled steel surrounds and appear in three configurations: 1) tripartite windows, featuring a single fixed pane of plate glass flanked by four-light casements set flush with the body of the dwelling, pierce the dwelling’s east and north elevations; 2) pairs of three-light casement windows pierce each of the elevations; and 3) single three-light casements pierce the south elevation.

The original steel doors with single glazing fill both the primary and secondary openings. A steel “shingled” awning supported on pairs of simple triangular steel brackets tops the front entrance. A wrought-iron railing encircles the west and north sides of the main stoop.

The interior of the dwelling retains most of its original Lustron materials and built-in features. Like the exterior, porcelain-enameled steel panels clad the interior walls and ceilings. The wall panels typically measure two-feet by eight feet with some larger panels below windows, while the ceiling panels are eight feet square. Wallpaper covers the panels on one wall of the living room, and a wallpaper border encircles the kitchen. Modern carpet covers the original asphalt shingle flooring. Some of the original metal kitchen cabinetry has been replaced as well.

The living room-dining area occupies the northeast portion of the dwelling, with the kitchen and utility room filling out the southeast corner. The bathroom and two bedrooms fill the west half of the dwelling. The bedrooms retain their original closets and overhead storage typical of Lustron design. The original heating system was replaced with forced air heating and cooling.

The garage is immediately southeast of the dwelling is a detached, one-car front gabled garage. Salmon-colored wood shingles clad the walls of the frame structure, and asphalt shingles cover the roof. A metal overhead door fills the single opening.
Site
This property occupies a grassy mid-block lot on the south side of West 15th Street. A concrete drive leads to the garage with a perpendicular walk leading to the front stoop. Chain link fence encircles the east, south, and west sides of the yard. A small section of matching fence connects the southeast corner of the dwelling to the northwest corner of the garage. There is another Lustron on the neighboring property to the east.

INTEGRITY
The Ooten House is in excellent condition with all of its interior and exterior panels, windows, and doors intact. Minimal alterations have been made to the original design and materials. Modifications of materials have been limited to replacement of the original asphalt tile flooring with carpeting, limited painting and wallpapering in the living room and kitchen, and new kitchen cabinetry. On the exterior, a wrought iron railing was added to the concrete stoop at the front entrance. The limited modifications to the dwelling do not impact the overall integrity of the property, and the original workmanship, materials, design, setting, feeling, and association of the property are readily apparent to the observer. Likewise, the garage is appropriately placed on the lot and is compatible with the design, scale, and massing of the Lustron. Its materials, while not the steel panels of the dwelling, are an appropriate addition to the property.

Research suggests that this dwelling was moved from its original location within approximately seven years after its original construction. While a moved building is generally not considered eligible for listing on the National Register, it may be eligible under Criteria Consideration B if it retains sufficient historic fabric to express its architectural significance under Criterion C. Additionally, it must retain an orientation, setting and general environment compatible with its historic location and associations. Although its original setting appears to have been in a rural oil field outside of Great Bend, the current location of this Lustron in a residential neighborhood is fully in keeping with the intended siting of Lustron homes. The dwelling sits on the western two-thirds of the standard-sized lot, with its driveway and garage occupying the eastern one-third. The front yard set back as well as the massing and scale of the dwelling are comparable to that of the neighboring dwellings in the neighborhood. In fact, the neighboring property to the west is also a Lustron dwelling. This dwelling is also distinctive as one of only ten examples of the Newport Deluxe Lustron model extant in the state of Kansas.
STATEMENT OF SIGNIFICANCE

The Ooten House is significant under National Register Criterion C for the area of ARCHITECTURE. In spite of being moved from its original location, this property fulfills the requirements of CRITERIA CONSIDERATION B. The Ooten Residence is one of only one hundred Lustron houses documented in Kansas, and one of only ten examples of the Newport Deluxe model. It is also a rare example of a Lustron that provided rental housing almost continuously from its original construction. Of the eight Lustrons currently extant in Larned, two, including the Ooten Residence, are located on adjacent lots in a five-block area of Scott and Adams' Addition. An additional five Lustrons are located in the nearby Mann and Parks Addition. The dwellings in Scott and Adams Addition, including the Lustrons, are typical of residential evolution that occurred in communities across the country between the 1880s, when the neighborhoods were platted, and the end of World War II.

In an effort to solve the post-World War II housing crisis, the Lustron Corporation, lead by Carl Stradlund, applied porcelain-enamed steel technology to residential design, producing a pre-fabricated dwelling that was "...fireproof, ratproof, decay-proof, [and] termite proof. Will never deteriorate or stain, never fade, crack or peel, never need painting, refinishing or reroofing [sic]" (Lustron Corp). Available in two-and three-bedroom models, these dwellings resembled typical, wood-frame post-war dwellings. However, their steel frames clad on the interior and exterior with porcelain enamel-coated steel panels distinguished Lustrons from more traditional contemporary residential construction. While Stradlund intended the Lustron to ease the national demand for home ownership, the durable, affordable design also made it attractive rental property. In Kansas Lustrons typically sold for around $10,000. Dan Brack, the Great Bend dealer, sold the slightly smaller Newport model for $8,500. In fact, the Lustron Corporation targeted the smaller, less expensive Newport Deluxe model to individuals interested in erecting more than one Lustron to use as rental property as well as to potential owner-occupants.

The Reconstruction Finance Corporation (RFC) rewarded Stradlund's efforts with $32.5 million in federal aid, plus the lease of a vacated airplane factory in Columbus, Ohio, for production of the dwelling components. Stradlund applied the tenets of automobile assembly-line mass-production to the Lustron. At the factory all of the components for each dwelling were loaded on a specially designed truck trailer and delivered to the building site, where company-trained builders erected the dwelling following the Lustron instruction manual. The Lustron Corporation actively produced houses between summer 1948 and June 1950. However, nationwide sales of Lustron homes never exceeded 250 units per month, far short of the 17,000 units per year that the company promised. The RFC filed foreclosure in March of 1950, and the company ceased production in June of that year having shipped fewer than 2500 of these unique all-steel dwellings nationwide.

SITE HISTORY

The Ooten House was originally located on oil-and-gas-lease land approximately twelve miles west of Great Bend. According to Kelly Puckett, a member of a Lustron building crew, it was built by Brack Implements of Great Bend for a gentleman named Talheim, whose tenant was a caretaker of his oilrigs (Puckett 2000).

The lots in Larned to which the Lustron was later moved were also part of oil-and-gas-lease land owned in the late 1940s and early 1950s by several oil companies, including Transwestern Oil Company and Sunray Oil Company. An oil and gas lease dated 1952 lists A.A. Doerr, a prominent Larned businessman, as the Grantee.
Since Lustrons were only constructed in 1949 and 1950 and Doerr utilized the property for oil and gas extraction at least as late as 1952, the Lustron house could not have been originally constructed in its current location (Pawnee County Deeds M9:335; M16:478).

It appears that Willard Ooten moved this Lustron from its original location in early 1957 (Ooten 2000). The Larned Community Development Corporation, Inc., sold the property to Willard H. and Ruth Ooten in February of that year (Pawnee County Deeds 43:436; 45:81). Willard Ooten was a building contractor and disassembled the Lustron from its previous location and moved it himself.

Both born around the turn of the twentieth century, Willard Ooten and his wife, Ruth Cunningham, moved to Larned in c.1930 (Larned Tiller & Toiler, April 18, 1972). The Ootens were in their fifties when they purchased the Lustron house and moved it to 507 W. 15th Street. The small Newport Model was perfect for rental property.

Ruth Ooten died in 1967. The family owned the Lustron for an additional five years until Willard Ooten’s death in 1972. The property had two subsequent owners before the current owners, Jerry and Jeanette Johnson, purchased the property in July 1995 (Pawnee County Deeds 55:190; 71:631). The Johnsons continue to utilize the house as rental property.
